Customer Problem Statement Template :

The **Automated Network Request Management using ServiceNow** project is designed to enhance the efficiency of managing network service requests by automating the entire request lifecycle. The system provides a user-friendly self-service portal where employees can submit requests such as VPN access, firewall modifications, IP address allocation, and network troubleshooting. Once a request is submitted, ServiceNow automatically routes it to the appropriate team, initiates the required approval process, and assigns tasks based on predefined workflows. Automation minimizes manual intervention, reduces processing delays, and ensures consistent request handling.

Aspect	Description in context of our project
 I am	 We are ServiceNow developers and IT automation enthusiasts working on building an automated network request management solution.
 I'm trying to	 Build a streamlined way for users to submit network requests and automate the entire approval, fulfillment and notification process.
 But	 Currently, the process is manual and time-consuming, leading to delays, errors, and limited visibility.
 because	 Requests are routed through emails and spreadsheets with no automation, proper tracking or SLA compliance.
 which makes	 The solution valuable by providing faster request handling, improved accuracy, better transparency, and higher user satisfaction.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
